

# LEM

PROJECTS (PTY) LTD

LEM Projects delivers integrated, high-performance solutions across supply chain and engineering. We engineer efficiency, build with purpose, and support industries with people-first precision.

# COMPANY OVERVIEW

## WHAT DRIVES US?

As a Level 1 B-BBEE contributor and 100% black woman-owned professional and multidisciplinary company, LEM Projects delivers integrated solutions across supply chain management and engineering services. Established with a commitment to innovation, excellence, and efficiency, LEM Projects supports industries such as mining and public sector including corporate strategic projects in supply chain management.

We pride ourselves on providing value-driven services that meet client expectations, regulatory standards and market demands.

With the owner having a strong foundation built on over 12 years of hands-on field experience, LEM Projects is positioned as a trusted partner that understand the operational, regulatory and commercial realities of simple and complex projects.

# WHY LEM PROJECTS?

Multidisciplinary Expertise: Integrated solutions across critical business functions

Client-Centric Approach: Flexible, scalable, and tailored services

Compliance & Quality: Adherence to South African regulatory and industry standards

Sustainability Focus: Commitment to responsible resource management.

Innovation-Driven: Leveraging systems and data to improve performance and reduce cost

# LEM SUPPLY CHAIN

## Optimising Procurement, Logistics, and Project Management

LEM Supply Chain is managed by experienced professional with qualification in Logistics and Project Management. The experience across mining, public sector and corporate environments makes our services efficiently managed.

LEM Supply Chain provides end-to-end supply chain solutions, including strategic sourcing, project procurement and management, inventory management and logistics coordination. Through streamlined processes and technology-driven platforms, we ensure the seamless flow of goods and services to meet dynamic project requirements.
